We are interested in a check on the placement requirements for emvau construction materials for the building measure described below, in accordance with the terms of delivery / statutory regulations:

Information on construction project (please fill in / tick where applicable)

Street:..... Postcode/City:.....

Type of construction project:

Located in water conservation area: not known no yes

Distance from groundwater

for first load-bearing layer: not known > 1 m ≤ 1 m

for second load-bearing layer: not known > 1 m ≤ 1 m

Construction period (from... to):

Proposed covering layer:

Asphalt Concrete Pavement with joints not exceeding 3 mm

Hall floor Film

Other

Use as

Frost protection material Load-bearing layer Combined on subgrade

Planned load-bearing layer:

➤ Average non-bound load-bearing layer: Size range 0/16 mm Size range 0/32 mm

➤ Average cement-bound load-bearing layer: Size range 0/16 mm Size range 0/32 mm
Soil consolidation with cement, hydraulically bound load-bearing layers (**emvau-mix**)
